

## **Seven Days of Canadian Adventure**

### **Complete Itinerary & Activity Plan**

(This is a sample itinerary and subject to change.)

#### **DAY ONE (November 13th)**

Today our adventure begins! On arriving at Winnipeg, you will meet the group at our hotel. Our first night is in a hotel close to the airport to give us plenty of time to rest after a long flight. The group will come together for a lecture in which Kristi & Jen will give you photography tools that you can use on the adventure ahead!

#### **DAY TWO (November 14th)**

Fly to Churchill. Churchill is known as the “Polar Bear Capital of the World.” From July to November approximately 800 Polar Bears migrate through this area. After arriving we will get settled-in with our B&B accommodations, explore the town and the area while looking for wildlife.

Each night in Churchill we will be on aurora watch and if the aurora makes an appearance before midnight, we will go out to photograph the sky. With around 300 nights a year with the Aurora Borealis visible, Churchill is one of the best destinations on earth to see the Northern Lights.

#### **DAY THREE, FOUR & FIVE (November 15th, 16th & 17th)**

On these three days we will embark on an adventure of a lifetime!

We will spend a bulk of our time on the tundra looking for polar bears and other wildlife. With the sea ice forming, polar bears should be quite active giving

us ample opportunity to document these majestic animals. Of note, in late mid-November, tourism is winding down – but the polar bears aren't! This is beneficial in myriad ways. We strongly believe in not disturbing wildlife on our tours and high season can put stress on animals. These times with less traffic are much more environmentally friendly and our interactions will be more private, giving us more opportunity to spend time watching behavior and being less obtrusive.

Our vehicles are small 4x4 vehicles. Which helps us not be so intrusive. Our vehicles fit 4 students, one photo instructor and our guide. You will have lots of opportunity to ask questions and get the perfect photograph.

In the evenings you will have a chance to have a one on one with Kristi and/or Jen getting valuable feedback on your photos.

### **DAY SIX (November 18th)**

Today should be an action-packed day with a half day wildlife tundra tour and dogsledding. We will end the day hoping for a beautiful showing of the Aurora Borealis.

### **DAY SEVEN (November 19th)**

Our last morning will be spent on the tundra looking for polar bears and/or in town. Then, we will fly to Winnipeg and have an afternoon image share and a group lunch to share all our favorite memories.

### **DAY EIGHT (November 20th)**

Everyone departs for home from Winnipeg.
